

Requirements for the (laptop) computer

For the selection tests that take place through online proctoring, the (laptop) computer used by the applicant must meet the hardware and software requirements. The overview below lists those requirements.

The requirements the (laptop) computer must meet:

- A working webcam (internal or external), ready to make video recordings
- A working microphone (internal or external), ready to make audio recordings
- A working keyboard and mouse (or other suitable pointer device)
- An internet connection (it is advised to have an upload speed of 1mb per second)
- Browser Google Chrome (version 10 or higher)
- An installed Proctorio plugin for Google Chrome. The exact specifications of the plugin differ per operating system and be found [here](#).
